

# Instructions

Hey you! Thanks for buying VueFileManager! We trully believe our software will help you solve your struggles you faced before you decided to find our solution. Here are some important questions

## How can I install VueFileManager?

[Here you can find](#) all server requirements and installation instructions you will need to successfully run VueFileManager instance on your server.

## My VueFileManager is down, what to do?

I believe you don't do something dangerous to crash your application, but no one never knows, right?

If you fall into this adverse circumstances, please email me into **peterpapp@makingcg.com** with subject [ **VueFileManager DOWN**  ] with error log from **/storage/logs/laravel.log** in attachment. Your email will be solved as soon as possible.

To get rapid response, I really recommend don't doing some server tweaks or app upgrade at the weekend. The response may be late.

## I have any trouble with VueFileManager, what to do?

[Please create a support message](#) and if your problem isn't urgent like app crash or you are systematically bombarded with crash errors, you will get email response after 1-3 days.

*Please continue on next page...*

## What can I do to improve VueFileManager?

Please get back to CodeCanyon page and write a review. The more reviews and the better rating, the more people will see VueFileManager in search results and more people buy VueFileManager.

The more licenses were sold, the more money we will have for development and we bring you back the more functionality for this software.

**Really appreciate it !**

## One more thing

Please give us 2-3 minutes and fill 4 questions about your experience with VueFileManager. It really help us sort priorities for next development round, what our buyers want the most and we should do.

Thanks, Peter.

Have a nice day!
